Funds held by trustee are subject to permitted investments authorized in the approved issuing documents and are not subject to mutual fund limits as defined in the MTC Investment Policy.

The MTC portfolio holds \$274.8 million in variable rate demand obligations (VRDO) issued by various California local agencies. The VRDOs are recognized as short term (30 days) investment bonds for accounting classification purposes even though the various securities have maturities up to 30 years. The classification as short term investments is possible because VRDOs have “liquidity instruments” that allow the bonds to be “put” to the liquidity bank at any time with seven days notice.
